**(Previous) DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The rejections of claims 13 and 17-24 under 35 U.S.C. 103(a) as being unpatentable over Tomioka et al. (US 5,853,910) have been **withdrawn**.
2. The rejections of claim 14-16 under 35 U.S.C. 103(a) as being unpatentable over Tomioka et al. as applied to claim 13 above, and further in view of Kobayashi et al. (US 2001/0053469) have been **withdrawn**.

**REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance:

The reason for the allowance of claims 13-24 is the recitation of a fuel cell comprising *a stop control unit that stops the flow of the cathode off-gas in the circulation passage by controlling the flow control unit when the fuel cell system is stopped; and a start-up control unit that controls the flow control unit after start-up of the fuel cell system until the fuel cell is brought into a predetermined operation state so as to hold the flow of the cathode off-gas in the circulation passage in a stopped state.*

The prior art references of record do not teach or suggest a flow control unit that controls a flow of the cathode-off gas in the circulation passage in combination with the stop control unit and the start-up control unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
